-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

1. Claims 1-13 and 21-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lee (US 2002/0010590) in view of Aoki et al (US Patent No. 5,933,506).

2. Regarding claims 1, 2, 4-5, 8-9, 11-13, and 21-24, Lee teaches a method of voice communication comprising: selecting one of a plurality of microphones (paragraphs 0023-0024); receiving a selected voice communication of a first language from the selected microphones (paragraph 0023); translating the selected voice communication from the first language to a second language by an intelligent control (113a), the second language different from the first to create a translated voice communication (paragraph 0025); transmitting communications using transmitters (paragraphs 0052-0065); and transducing the translated voice communication at a speaker (paragraph 0024).

Lee does not teach an earpiece unit having a housing and a plurality of microphones within the earpiece housing. However, it was well known to provide an earpiece, which includes a housing and a plurality of microphones in a communication system, for the purpose of providing improved signal processing via background noise reduction and desired signal enhancement. Aoki discloses a transmitter-receiver having ear-piece type acoustic transducing parts, which provides for a microphone for picking up bone-conducted sound, a directional microphone for picking up air-conducted sound and an electro-acoustic transducer for

Art Unit: 2654

transducing a received speech sound and automatically processed the speech signal in accordance with use environments to send speech of the best quality (col. 2, lines 38-51).

It would have been obvious to one of ordinary skill at the time of the invention to modify the system of Lee to provide an earpiece having a housing and plurality of microphones, as was well known in the art, for the purpose achieving improved signal processing and signal enhancement.

3. Regarding claim 3, Lee teaches transmitting the voice communication of a first language to a translation station and receiving the translated voice communication from the translation station (paragraphs 60-61).

4. Regarding claim 6, Lee teaches the second language is English (paragraph 61).

5. Regarding claim 7, Lee teaches first language is English and the second language is different from the first language (paragraph 62).

Response to Arguments

6. Applicant's arguments with respect to claims 1-13 and 21-24 have been considered but are moot in view of the new ground(s) of rejection.
